

## Workshop

### *The logic and psychology of confirmation and information search*

Munich, 26 February 2013

The workshop is the mid-term event within a three-year research project funded by the DFG on *Models of information search: A theoretical and empirical synthesis*. The project is part of the wider DFG Priority Program *New frameworks of rationality* (SSP 1516: <http://www.spp1516.de/>), launched in 2010 to promote collaboration between psychologists, philosophers and other related research communities towards an integrated approach to the study of human rationality. Members of the research group attending the meeting will include: Jonathan Nelson and Björn Meder (MPI Berlin), Laura Martignon (Ludwigsburg), Katya Tentori (Trento), Vincenzo Crupi (Turin and MCMP), Gustavo Cevolani (Bologna), and Christine Szalay (Konstanz). The meeting is free to attend and will take place in the Statistics Seminar Room, Ludwigstrasse 31/33, first floor.

#### SCHEDULE

- 9:30 Welcome and coffee
- 10:00 Björn MEDER and Jonathan NELSON (MPI Berlin)  
*Is people's information search behavior sensitive to different reward structures?*
- 10:30 Vincenzo CRUPI (University of Turin, MCMP)  
*Pathways between Bayesian confirmation theories and models of information search*
- 11:00 Coffee break
- 11:30 Laura MARTIGNON (Ludwigsburg)  
*On mermaids and princesses*
- 12:00 Katya TENTORI (Trento)  
*Probability vs. confirmation judgments.  
A comparison in accuracy and test-retest reliability*
- 12:30 Gustavo CEVOLANI (Bologna)  
*Similarity, verisimilitude, and information*
